DETAILED ACTION

The election of the group II (claims 9-20) with traverse is acknowledged. However, a further restriction requirement is required as follows:

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

II (a). Claims 9-18, drawn to an engine with an indicator, classified in class 123, subclass 399.

II (b). Claims 19-20, drawn to an engine with a means for disengaging interface, classified in class 123, subclass 361.

The inventions are distinct, each from the other because of the following reasons:

Inventions II (a) and II (b) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
